As a programmer with experience in frontend and backend web development, I also possess extensive knowledge in creating virtual environments using Unreal Engine. Exploring the latest emerging open-source technologies is a passion I pursue in my free time. Constant communication with my team is a priority, ensuring that my contributions enhance our work and provide comfort and optimum conditions for everyone involved.

PROFESSIONAL EXPERIENCE

Ideography, **Puebla, Pue**
Interactive architectural visualization programmer *2016 – 2018*

- In this role, I was responsible for integrating emerging technologies into interactive architectural visualizations, including virtual reality, augmented reality, mobile applications, and IoT solutions. My duties encompassed overseeing the entire project lifecycle—from requirement gathering and cost estimation to project execution.

TROOPSMX **Puebla, Pue**
Software Development *2018 - 2021*

- I joined the company as a Software Developer, with a focus on developing emerging technologies for brand activation initiatives. I was actively involved in the entire process, from collaborating with clients to refine ideas and establish requirements, to outlining costs and overseeing execution.
- Throughout a diverse range of projects, many involved developing web applications for registration systems, streaming services, and microsites. In these developments, I was responsible for fully coding both the backend and frontend, working closely with a team of designers.

The Line Productions Lab **Puebla, Pue**
Software Development *2021 - present*

- I joined the company as a Software Developer, focusing on applying emerging technologies to optimize workflow processes within the company. Additionally, I conducted research on open-source projects that could be leveraged for brand activation initiatives.

Freelance Developer **México**
Virtual Environment Programmer *2018–2024*

- For many years, I have been involved in software development specialized for industry throughout the entire project lifecycle. I have adapted to the specific requirements of each company, integrating emerging technologies to address challenges where existing solutions have been surpassed
